Inspiration awaits with the ŠKODA Yeti, no matter which road you take. Whether it's the city with its constant energy or the countryside where the road ends and adventure begins. Available as either the Yeti or the Yeti Outdoor, the car can be further fine-tuned to fit your needs with a selection of engines, front-wheel or 4-wheel drive, plus a range of accessories. And like any other ŠKODA, it offers numerous thoughtful Simply Clever details that make life on the road more comfortable.

This car is yet another example of our rich history of forward thinking. It means being passionate about making beautifully designed cars that are as much a joy to drive now as they were back when we started. Because looking back on our enduring legacy inspires us to look ahead.

That's Simply Clever. That's ŠKODA.

# DESIGN

# EXTERIOR DESIGN

The Yeti model is a successful representative of ŠKODA in the compact SUV (Sport Utility Vehicle) class. And as such it offers both functional features typical for this segment and unique lines and details defined by the ŠKODA design language. While the Yeti version with exterior elements in the body paint colour will captivate you with its urban style, Yeti Outdoor version instantly announces its adventurous intentions.

The front as a whole gives a robust impression and evokes a safe feeling. The individual elements then declare its belonging to the ŠKODA family, for example the distinctive front grille, sharply cut front headlamps and fog lamps or the ŠKODA logo dominating the bonnet.

The higher 5-door body structure with vertical hatchback is typical for SUVs, as is the higher ground clearance to overcome challenging terrain.

The car's character is accentuated by angular wheel arches. Another effective yet practical feature are the SunSet tinted windows in the rear. The urban elegance of the Yeti version can be further highlighted by the 17" Scudo alloy wheels (on the photo).

The electrically-adjustable panoramic roof window, which allows you to create a large open space above the front seats, will enhance the attractiveness of the car and will bring more riding enjoyment to the whole crew.

Black protective side door strips and door sills, bumpers with black lower parts and attractive alloy wheels are the features that emphasise the individuality of the Yeti Outdoor version (pictured are 17" Matterhorn alloy wheels).

The confident expression of the car is enhanced by Bi-Xenon headlamps with LED daytime running lights. The shape and location of the fog lamps, which are available with the corner function, reflect the design language of ŠKODA. The Yeti Outdoor version features massive vertical fins on the air intake opening on the front bumper.

In the rear you will discover many elements that are typical for the ŠKODA make: the logo, ŠKODA lettering, model name, triangular recesses defining the space for the number plate, etc. The rear lights, with double C-shaped illumination, can be equipped with LEDs. The massive rear bumper and noticeable silver protective cover feature the Yeti Outdoor version.

# COLOUR CONCEPT

You'll instantly recognise your car without the need to check the registration plate. The ColourConcept offers many options for both Yeti and Yeti Outdoor to personalise your new car. You can find more information about combinations of body paints, roofs and external mirrors at your authorised ŠKODA partner.

# INTERIOR DESIGN

Spaciousness, variability, quality materials and excellent craftsmanship are all characteristics you will appreciate both in a city jungle and in the wild. Thoughtful application of ergonomics, typical for ŠKODA, ensures natural control of the car and its functions. The feeling of security behind the steering wheel is further increased by a perfect view from the car, thanks to a higher seat position.

On an exciting journey in pursuit of new experiences, the electrically-adjustable panoramic roof window gives you the feeling of unlimited space and freedom. The front part of the sunroof can be tilted up and slid backwards. The rear part is firmly built into the roof. The tinted glass, of which both parts are made, has lower light transmission and thermal permeability, so it helps create an optimum climate and comfort inside the car. If needed, you can cover the entire sunroof with an electrically-adjustable roll cover.

**SAFETY**

# ASSISTANT SYSTEMS

Whether on your daily drive to work or on an adventurous trip, the Yeti model provides you with maximum safety. The car features excellent road holding, which is also credited to ESC (Electronic Stability Control). This system, including a number of functions, increases control of the car in extreme situations. Your safety, mainly during long-distance travel, is ensured by the Driver Alert and, during a parking procedure, you will appreciate parking systems.

The Driver Alert evaluates data from the power steering sensors at speeds above 65 km/h. When the system detects behaviour indicating that the driver might be tired, such as more intensive driving direction corrections with the steering wheel, it recommends taking a break.

The Park Assist is a great helper. It will select an appropriate parking place, park in a row of parallel or perpendicular parked vehicles, and can even drive out of a row of parallel parked vehicles. In the case of parallel parking, it only needs a space 60 cm longer than the car itself.

Using sensors in front and rear bumpers, the Park Distance Control activates an audible signal based on the assumed directional movement of the car for any relevant obstacles, so that it does not unnecessarily warn you about front placed obstacles when the reverse gear is shifted.

The rear-view camera can be located on the 5th door handle. It monitors the space behind the car and indicates the driving lanes, based on the vehicle width. This assistant system is always supplied with parking sensors (Park Distance Control) and a radio or a navigation system, which shows your progress during parking on the display.

# PASSIVE SAFETY

In extreme situations, where the driver cannot actively influence the outcome, the car's passive safety elements take over. Like the airbags. You can equip your car with up to nine of them.

The head airbags, which create a "wall" along the side windows when activated, protect passengers' heads in the front and rear.

The driver knee airbag prevents contact with the lower part of the dashboard in the event of a collision.

While the driver airbag is hidden in the steering wheel, the passenger airbag is located in the dashboard. If needed, it can be deactivated so that you can fit a child seat in the front seat.

The third headrest in the rear is height adjustable and increases the safety of the passenger in the middle seat.

The front and rear side airbags protect the pelvis and chest of the driver and other passengers in the event of a side collision.

# TECHNO LOGY

# INFOTAINMENT

Our radio and navigation systems perform many tasks, such as bringing entertainment, enabling safe phone calls and supplying critical information like traffic updates during the drive. These multi-functional systems can further be equipped according to your specific needs. The car also enables you to connect your external devices.

The Swing radio with a 5" colour touch-screen display comes with a USB/Aux-in connection, SD card slot and four 20W speakers. Bluetooth and DAB (Digital Audio Broadcast) come as optional. The device can even be used to control the car menu.

The top Bolero radio with a 6.5" colour touch-screen display offers, in addition to the same features as the Swing radio, Bluetooth and four speakers in the rear. SmartLink system and DAB (Digital Audio Broadcast) come as optional.

The Amundsen navigation system, controlled via a 6.5" touch-screen display, has two SD card slots and comes with an SD card pre-installed with maps. It's further equipped with all standard functions of a top radio, plus optional SmartLink system and DAB (Digital Audio Broadcast).

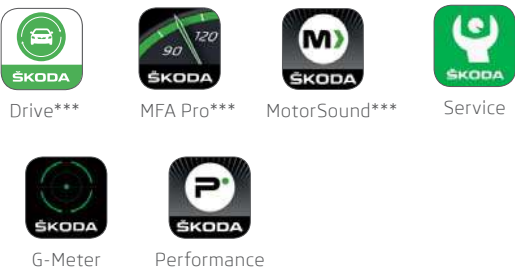

The Sound System with twelve speakers and digital equaliser allows a wide range of settings. It is available in combination with Bolero or Amundsen infotainment system.

With the SmartLink system (ŠKODA Connectivity bundle supporting MirrorLink®, Apple CarPlay\* and Android Auto\*), the radio enables the driver to safely use the phone while driving. All installed applications that are certified as safe for vehicles are compatible with MirrorLink®, Apple CarPlay or Android Auto.\*\*

Your car can be also equipped with the SmartGate system. It enables to connect your smartphone to the car via WiFi to access interesting data about your drive, like driving economy, driving dynamics or service information.\*\*

\* Detailed information is available at [Apple.com/ios/CarPlay](https://apple.com/ios/CarPlay) and [Android.com/Auto](https://android.com/Auto).  
\*\* Visit our website for usage terms and compatibility information for SmartLink or SmartGate.  
\*\*\* Applications are compatible also with SmartLink.

# COMFORT

The comfort equipment takes car journeys to a whole new level. Advanced technology is behind both the driver's sophisticated systems as well as features enhancing the comfort of the whole crew. Higher comfort doesn't only mean a more enjoyable drive but also a safer one.

The leather multifunctional steering wheel with chrome elements enhances your joy of driving the car. The top offer includes a 3-spoke sports steering wheel in perforated leather with controls for the radio, phone and the automatic DSG (Direct Shift Gearbox).

Climatronic, dual-zone air conditioning with electronic regulation and automatic air circulation, gives you the option of setting a different temperature for the left and right sides of the interior.

The KESSY system (Keyless Entry, Start and exit System) enables you to use the car without a key. To switch the engine on and off you simply use the Start/Stop button.

The electrically-adjustable driver seat is equipped with memory, which can store three different positions of the seat and the external side-view mirrors.

The illumination of the entry area by Boarding Spots, integrated into the external side-view mirrors, enables you to safely enter and exit the car even in complete darkness.

The integrated telescopic headlamp washers keep the headlamps perfectly clean.

You will especially appreciate the external side-view mirrors that retract automatically once you lock the car when parking on city streets.

A wide-angle photograph of four hikers walking across a vast, flat expanse of light-colored, rounded river stones. The hikers, two men and two women, are dressed in outdoor gear and carry large backpacks. They are walking from left to right. In the background, there are rolling green mountains under a bright, slightly hazy sky with wispy clouds. The overall scene conveys a sense of adventure and outdoor performance.

# PERFOR MANCE

# ENGINES AND TRANSMISSIONS

The engine you choose will give your car a specific character. So it's up to you to fulfil your wishes and expectations. Remember, that the offer of engines can depend on the car version (Yeti or Yeti Outdoor), the equipment level and the front or 4-wheel drive.

The automatic DSG (Direct Shift Gearbox) creates excellent acceleration while keeping the engine in an optimum state. With economical driving, fuel consumption is kept low. Based on the specific engine, we offer you a 7-speed or a 6-speed version.

Drivers who prefer manual gear shift may choose an engine with 5-speed or 6-speed manual transmission. Both options offer precise and easy gear shifting with short gear lever throw.

All petrol engines feature TSI technology, which gives them a dynamic character. Our offer includes 81kW, 92kW and 110kW engines.

The diesel engines with 81kW or 110kW performance guarantee smooth running at exceptionally low fuel consumption.

# YETI 4X4

With the 4x4 drive you will discover unexpected possibilities. If you choose the 4x4 drive in combination with the off-road system, you can easily negotiate difficult terrain and always completely rely on the vehicle. The off-road option includes a number of functions such as a hill descent assistant, the adaptation of the electronic systems (ABS, ASR and EDS)\* to the driving conditions and a more sensitive accelerator pedal configuration.

Automatic 6-speed DSG (Direct Shift Gearbox) and the 4x4 drive present the perfect match that guarantees an extraordinary driving experience.

The 4x4 drive is provided by an inter-axle, electronically-controlled, multi-plate clutch. The coupling of the rear axle is automatic, so under normal conditions the car can utilise the advantages of front-wheel drive, and under extreme conditions, the excellent traction of the 4x4 drive.

\* Anti-lock Braking System, Anti-Slip Regulation and Electronic Differential System.

# SIMPLY CLEVER

# INTERIOR STORAGE

Storage compartments significantly increase the practicality of the car. Namely, they simply multiply its transport options, help keep the car tidy, and make travelling more pleasant for all passengers.

Closer inspection reveals many storage spaces and compartments because the entire concept of the interior is Simply Clever. Everything you need has its place in the interior, including keys, mobile phones, glasses, parking tickets, maps, refreshments and any other necessities that you carry in your car. And, most importantly, you always know where to find them.

The eyeglasses compartment is located in the roof panel above the interior rear-view mirror, so the driver always has his sunglasses or driving spectacles within reach.

When the waste basket is full, it can be easily removed and emptied. It can be inserted into the storage compartments in both the front and rear doors. The storage compartments in both front doors can hold a 1-litre bottle.

A special pocket for a reflective vest is located under the driver's seat, ensuring it's immediately within reach if you need it.

External appliances can be transported safely in the multimedia bracket located in the dual drinks holder on the centre console.

Rear seat passengers will appreciate foldable tables with drink holders, built into the backrests of both front seats, which of course can be used for more than just refreshments.

# LUGGAGE COMPARTMENT

The luggage compartment capacity makes the Yeti model the perfect partner for an active lifestyle. In addition, we offer a range of Simply Clever details and solutions, which you can choose according to your specific needs.

The double floor provides you with a hidden storage compartment. Simultaneously, it facilitates handling luggage by bringing the floor of the luggage compartment closer to the loading edge.

The net programme, which reliably prevents things from shifting, offers several layout options.

You can use the double-sided carpet with the textile side up if you are not carrying anything that could dirty the car. When needed, simply turn it over with the washable rubber side up (on the photo).

The foldable backrest of the front passenger seat gives the car even greater variability and allows you to transport objects with extraordinary dimensions.

The removable Unibag, which is designed for transporting skis or snowboards, can be easily pushed through the opening between the luggage compartment and the passenger compartment.

The removable LED flashlight can come in handy when driving at night and during other circumstances. When clipped in, it automatically recharges while the engine is running.

# VARIOFLEX

The VarioFlex rear seating system, which comes as standard equipment in both versions of the car, allows you to customise the interior according to your current situation and needs. The system consists of three independently adjustable rear seats. The operation can easily be performed by a single person and without the need for any tools. By removing the seats you gain a luggage area with a capacity of 1,760 litres.

The backrests of the rear seats may be completely folded down towards the sitting sections.

If you need to maintain rear seating for passengers, you can fold down only one or two backrests.

To enlarge the luggage area, you can tilt whole rear seats towards the front seats.

Another useful option is removing one or two rear seats completely, so you gain a large luggage area while still carrying passengers in the rear.

# CUSTOM ISATION

# ACTIVE EQUIPMENT VERSION

The Active version interior includes black decorative elements, such as door handles and air-ventilation frames. The standard equipment covers electric front window controls and electrically-adjustable external side-view mirrors.

Active Black interior

# AMBITION EQUIPMENT VERSION

The Ambition version interior includes decorative chrome elements such as door handles and steering wheel details. You can choose from a number of seat upholstery. The standard equipment covers electrically-adjustable and heated external side-view mirrors and air conditioning.

# LAURIN & KLEMENT

# LAURIN & KLEMENT

Why should you distinguish between ordinary days and special occasions? The ŠKODA Yeti and Yeti Outdoor Laurin & Klement, which represent the highest equipment level, make every day exceptional. These most luxuriously furnished vehicles provide extraordinary comfort and captivate with original elements and premium materials.

The L&K versions come with brown leather interior. The backrests of the front and middle rear seats are decorated with the Laurin & Klement logo.

The 3-spoke leather multifunctional steering wheel allows you to control the radio and telephone.

The Laurin & Klement logo embossed in the leather seat backrests is another stamp of exclusivity.

The decorative door sill strips with noble steel inserts and a Laurin & Klement inscription are another stylish detail.

The Yeti L&K is equipped with the elegant two-colour 17" Annapurna alloy wheels.

The Yeti Outdoor L&K comes with the impressive two-colour 17" Origami alloy wheels.

# MONTE CARLO

# MONTE CARLO

Take the successful history of ŠKODA cars at the legendary Monte Carlo Rally. Mix it with the style and glamour of the principality. And you get the exciting ŠKODA Yeti Monte Carlo. The car features black exterior elements, which give it a unique style and a ferocious expression, such as the external side-view mirrors, front grille frame, front fog lamps, front bumper spoiler and plastic door sill covers.

The interior features sports seat upholstery in a combination of red, black and grey. The knob and sleeve of the gear stick and the handbrake handle come in black leather. The sleeve is decorated with red stitching, which you can also find on the front seat armrest and on the carpets.

The sports 3-spoke steering wheel in black perforated leather is also decorated with red stitching.

The front door sill strips with a Monte Carlo inscription have both decorative and protective functions.

The Monte Carlo version is also characterised by LED rear lights, a black rear diffuser and a decorative exhaust pipe end piece. To further enhance the overall impression as well as the passengers' comfort, the car is equipped with SunSet tinted windows in the rear. The black roof, which also comes as standard equipment, perfects the look.

The distinct style is underlined by the 17" Origami alloy wheels with a polished surface in a Monte Carlo design.

The 17" Erebus alloy wheels in a black design are an attractive option.

# ACCES SORIES

# ACCESSORIES

Enhance the charm, practicality and safety of your car with ŠKODA Genuine Accessories. You can find the complete range in the Octavia Accessories catalogue, which is available at authorised ŠKODA partners.

The clothes hanger is an extremely practical accessory, mainly for those who travel to work wearing a suit.

The net under the parcel shelf is not only a suitable storage place for an umbrella but anything you may want to separate from the other luggage as well.

The decorative door sill strips with aluminium inserts effectively protect the door sills against mechanical damage when getting in and out of the car.

The plastic dish with raised edges prevents the car upholstery from getting soiled or damaged. The dish can be easily taken out and emptied or wiped clean.

The rear bumper cover foil protects the rear bumper as well as the loading edge, while the triangle-shaped stripes improve visibility of your car.

## General information

### ŠKODA Service

Put your car in good hands. We give you good reasons to choose an authorised ŠKODA service partner.

#### We offer you first-class quality

Your car requires advanced technology. All the authorised ŠKODA service partners have special tools and quality diagnostic systems at their disposal to ensure the perfect functionality and reliability of your car.

#### Professionally trained staff by the manufacturer

The ever-rising standard of the technology used in our cars requires corresponding professional qualifications on the part of the staff. To meet this requirement, the manufacturer organises regular training for the authorised ŠKODA service partners in order to provide them with up-to-date information important for their activities.

#### Our motto: be fair and open with our customers

Careful, professional and friendly counselling for the customers upon acceptance of orders is just as important to us as diligence and completeness with respect to repairs and maintenance work. All this is continuously monitored by internal quality control.

#### Comprehensive range of services:

##### › Service inspections

The authorised ŠKODA service partner guarantees the performance of regular service inspections in accordance with the manufacturer's instructions and ensures the long-term functionality of your car. The service schedule informs you when the service inspection must be done.

#### › Body and paintwork service

Damage to the body and painted areas will be fixed by your authorised ŠKODA service partner in an expert manner, in accordance with the manufacturer's instructions, using ŠKODA Genuine Parts. This is important not only for your safety, but also for functionality and maintaining your car's value.

#### › Courtesy car

The authorised ŠKODA service partner can provide you with a courtesy car for the period of repair or service inspection.

#### › Pick up and delivery service

If you are unable to take your vehicle to the ŠKODA Service, an authorised ŠKODA service partner will arrange a date with you to pick up the car. The car will be delivered back to you after the service work has been completed.

The listed services represent only part of the wide range of ŠKODA Service offers, which may vary from country to country. Please contact your authorised ŠKODA service partner for further details.

### ŠKODA Applications

#### ŠKODA Service App - ŠKODA Service in your pocket

The ŠKODA Service application is designed for smartphones operating on iOS and Android systems and its purpose is to help ŠKODA customers in any difficult situation they may encounter on their travels.

#### ŠKODA Manual App - know your vehicle

The ŠKODA Manual application is aimed at users of tablet PCs who are interested in ŠKODA

vehicles or already own one. The application contains a full featured digital version of the owner's manual for all current ŠKODA models.

### ŠKODA Genuine Accessories

ŠKODA Genuine Accessories offer you a wide assortment oriented to five main product groups (sport and design, music and communication, comfort and utility, transport and safety) and bicycle products. For more detailed information on the complete ŠKODA Genuine Accessories range see the individual ŠKODA model catalogues.

### ŠKODA Genuine Parts

#### Safety

ŠKODA Genuine Parts are identical to those used in the assembly of ŠKODA vehicles. The use of first-class materials and technologies guarantees safe and worry-free motoring.

#### Availability

ŠKODA AUTO offers a complete range of parts and equipment items used in the vehicle's series production and does not merely focus on high-turnover parts. ŠKODA Genuine Parts needed for vehicle operation continue to be supplied for up to 15 years after production of the relevant model ends. The availability of other groups of parts depends on their importance.

#### Long service life

ŠKODA Genuine Parts are provided with a minimum two-year guarantee. The use of first-rate materials and manufacturing technologies applied in the production of our products ensure

their maximum reliability and long life. As proof, we have extended the genuine batteries warranty to three years.

#### Environment protection

The ŠKODA Genuine Parts range includes exchange parts, which are manufactured with a low environmental impact in terms of waste, excess heat and water contamination.

### Information on the internet

Information is available at [www.skoda-auto.com](http://www.skoda-auto.com) to assist you in deciding which vehicle suits your needs, thanks to the detailed descriptions and photographs of all our models. Visit [www.facebook.com/skoda](http://www.facebook.com/skoda) and become a fan of ŠKODA to receive the latest updates and get in touch with our community.

### ŠKODA Finance

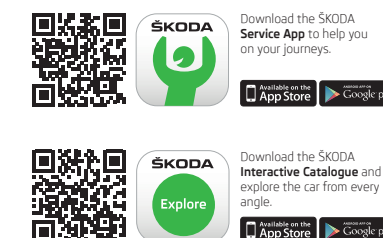

ŠKODA Finance provided by ŠkoFIN offers solutions for both individuals and businesses. Purchase your car with favorable conditions without additional costs. You can learn about the current credit or lease offer through any authorised ŠKODA partner.

### Global fleet

The ŠKODA AUTO Global Fleet Services offer B2B fleet solutions to customers with all kinds of requirements. A fleet made up of ŠKODA cars offers unmatched roominess, long-lasting quality, safety, low total costs of ownership and as a result excellent value for money. You can find more information about our products and services at [www.skoda-auto.com/fleet](http://www.skoda-auto.com/fleet).

Some models in this catalogue are shown fitted with optional or extra equipment not necessarily included in the standard equipment. All details of technical specifications, design, equipment, materials, guarantees and appearance were accurate at the time of going to print. However, the manufacturer reserves the right to make any changes without prior notice. The information included in this catalogue is for guidance only. Due to printing technology limitations, the colours of paints or other materials shown in this catalogue may differ from reality. For up-to-date information and further details on standard and optional equipment, current prices and delivery terms and conditions contact your authorised ŠKODA partner. This catalogue was printed on cellulose paper which was bleached without using chlorine. The paper is 100% recyclable.

The environmental logo expresses ŠKODA AUTO's awareness of, responsibility for and attempts at the sustainable development of the company and a friendly approach to life and nature.
